

THREE SOLUTIONS. ONE GOAL.

Maximize flowering, pod development and nutrient absorption in plant stress situations with these three products!

FoliarBranch Plus

Increases flower and pod count.

+

FoliarStress Plus

Improves ability to overcome stress.

+

FoliarTrace Plus

Enhances plant nutrition.

**Jar test products prior to mixing.
Do not let products freeze.*

THE FOLIAR TRIPLE THREAT

*Powerful on their own.
Unstoppable when used together.*

FoliarBranch Plus

+

FoliarStress Plus

+

FoliarTrace Plus

FoliarBranch Plus + **FoliarStress Plus** + **FoliarTrace Plus**

FoliarBranch Plus is a cutting-edge foliar applied fertilizer featuring a unique blend of Magnesium and carboxylic acids. This powerful combination enhances plant branching and thickens stems, producing more efficient and productive crops. Ideal for use on Soybeans and Wheat, **FoliarBranch Plus** is your go-to solution for maximizing crop performance and yield potential.

WHY FOLIARBRANCH PLUS:

- ✔ Boosts Flower & Pod Count Resulting in Heavier Test Weight
- ✔ Promotes Branching for Fuller Crops
- ✔ Optimizes Nutrient Utilization
- ✔ Enhances Plant Health
- ✔ Expedites Row Closure to Reduce Weed Pressure

HOW TO APPLY——

FOLIAR APPLICATION 3.5 FLUID OUNCES PER ACRE

Soybeans: Between stages V4-V6 with post chemicals

Wheat: Between stages V4-V6 with post chemicals to increase the number of tillers

FoliarStress Plus is a premium liquid foliar fertilizer that blends essential nutrients with organic matter, Humic, and Fulvic acids. These organic carbon compounds significantly boost nutrient uptake and enhance nutrient movement within the plant, enabling more vigorous growth and resilience during stress periods.

Regularly using **FoliarStress Plus** ensures consistent productivity and optimal plant development throughout its life cycle by promoting a healthy balance between the plant's aerial and root systems.

WHY FOLIARSTRESS PLUS:

- ✔ Helps Hold Flower & Pod Count
- ✔ Minimizes Abiotic Stress in Plants (*Rain, Sunlight, Drought*)
- ✔ Supplies Essential Macro & Micronutrients (*N, P, K, B, Co, Cu, Fe, Mn, Zn*)
- ✔ Enhances Crop Metabolism & Growth
- ✔ Provides Organic Carbon & Seaweed Extract (*Stress Mitigator*)
- ✔ High Stability Across a Variety of pH Levels
- ✔ Boosts Enzyme Regulation, Water & Nutrient Absorption

HOW TO APPLY——

FOLIAR APPLICATION 28 FLUID OUNCES PER ACRE

Soybeans: Between stages V4-V6 with post chemicals and/or R2 with fungicide

Corn: Between stages V4-V6 with post chemicals and/or VT-R2 with fungicide

Wheat: Between stages V4-V6

FoliarTrace Plus is a specialized foliar fertilizer designed to counteract factors that negatively impact crop development and yield, such as intense solar radiation, drought, and pesticide-induced stress. Its unique blend of micronutrients promotes the synthesis of essential amino acids like proline and glutamine, which are crucial for plant stress recovery and protein formation.

By enhancing these processes, **FoliarTrace Plus** ensures stronger, more resilient crops and maximizes yield potential.

WHY FOLIARTRACE PLUS:

- ✔ Helps Hold Flower & Pod Count
- ✔ Ideal for Stressful Weather Conditions
- ✔ Provides Essential Micronutrients (*S, B, Cu, Mn, Mo, Zn*)
- ✔ Boosts Metabolic Activity & Energy Efficiency
- ✔ Enhances Plant Health & Productivity
- ✔ Exclusive Stable Foliar Formulation

HOW TO APPLY——

FOLIAR APPLICATION 13.5 FLUID OUNCES PER ACRE

Soybeans: Between stages V4-V6 with post chemicals and/or R2 with fungicide

Corn: Between stages V4-V6 with post chemicals and/or VT-R2 with fungicide

Wheat: Between stages V4-V6
